DETAILED ACTION

1. This action is response to communications: application, filed on 12/19/2001; Appeal Brief filed on 01/14/2008; claims 1-17, 19-32 and 37-56 are pending; claims 18 and 33-36 are canceled.

2. Authorization for cancellations independent claim 33 and its dependent claims (claims 34-36) was given in a telephone interview with Attorney Barry N. Young, Reg. No. 27,744, on January 14, 2009.

3. Authorization for this examiner's amendment was given in a telephone interview with Attorney Barry N. Young, Reg. No. 27,744, on January 16, 2009.

4. The claim has been amended as follows:

Claims 33-36 (Canceled)

Claim 43:

(Currently Amended) A method for measuring the end-to-end response time of each electronic transaction message sent from a network client side to a network server side of a Web site, the method comprising:

establishing a communications connection between the network client and the Web site network server through an electronic transaction assurance system (eTA);

receiving a network message from the network client, comprising a request for a Web site page such that the request identifies a transaction type and message parameters, thereby defining an electronic commerce transaction to which the message relates;

adding code to the Web page served to the network client that records the time when a request message is sent by the network client, indicating the start of an electronic commerce transaction, and when a response message is received by the network client, indicating the end of said electronic commerce transaction;

generating a transaction identifier associated with each electronic commerce transaction request message received from the network client and storing the transaction identifier information with the transaction type and message parameters at a back end database;

preserving a state of the electronic transaction and updating the transaction type and message parameters in response to processing of the electronic transaction;

resuming the electronic transaction from a failure based upon the preserved state at the failure; and

masking the failure by providing an expected response to the request message from the network client.

Reasons for allowance

With respect to claims 1, 14, 19, 37, 43 and 51-56, the prior arts of record, singly or in combination fails to teach the features of claim(s) limitations thereof. Specially, inter alia, it fails to teach method of processing electronic commerce transactions those exchange between a client and a server through an electronic transaction assurance system (eTA) wherein a failure of the electronic commerce transaction and the actual state of the electronic commerce transaction at the failure are detected; appropriate recovery action to recover from the failure based upon said

actual state is selected; transmitting a response message to the client in accordance with the recovery action, wherein the response message masks the failure from the client.

Claims 2-13, 15-17, 20-32 and 44-50 further limit the allowed claims, therefore they are also allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
